

# PARK MATES

Say goodbye to the nerve-  
wracking task of finding a  
parking spot.

Say hello to new mates.

ParkMates

# The Problem

Available parking spots are close to extinction.

## **Public parkings are almost always full**

Thus leaving people with no choice but to take someone else's spot or risk leaving their cars parked illegally.

## **Individual parking spots are not used 24/7**

As a consequence, a vacant parking spot might stay unoccupied even for days, in the temporary absence of its legal owner.

# The Utopia

You can always leave your car somewhere safe and legally parked.

## Lend your reserved spot

Do you have a parking spot legally associated to you?  
Lend it to someone else when you're not using it.

## Borrow someone else's spot

In need of a parking spot and wondering if its user won't be using it for the next few hours? No more need to wonder.

# ParkMates

ParkMates is here to make all your dreams come true.

Introducing a new community ready to help when it comes to parking.

# Timing

## The city's population is continuously growing

With the student community as numerous as ever and the tech industry exploding, our city is now, more than ever, in need of its maximum parking capacity to be available.

## In-your-pocket solutions are expected

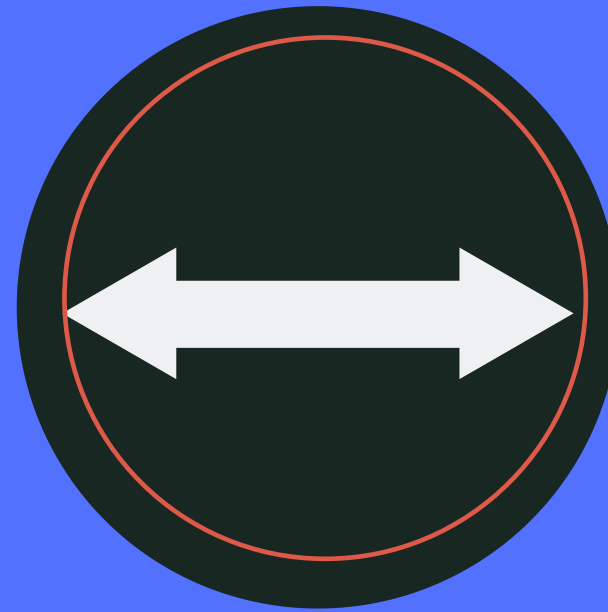

People are one with technology nowadays, so as easy a procedure is, as likely it is to be "approved" by the wide public.

# Key App Features

Range-specific  
facilities

Lend-Reward type  
benefits

Flexibility in booking

# Competitive Advantages
